RESEARCH INTERESTS

My research focuses on **software quality**. I use qualitative and quantitative methods to identify socio-technical defects and shortcomings. I identify and resolve problems using systems and security principles. For example:

- **Troublesome tools:** I have given a strong empirical foundation to the study of regular expressions (FSE'18, FSE'19, ASE'19a, ASE'19b).
- **Emerging paradigms:** I have studied the systems and security issues that arise in event-driven programming as embodied in the Node.js framework (EuroSys'17, USENIX Security'18). I have also examined security issues in the use of the query language GraphQL (ICSOC'19, FSE'20).
- **Distributed systems:** I hold several patents on testing distributed storage systems, and have researched performance issues in stream processing engines (USENIX ATC'19).

EDUCATION

Ph.D Computer Science 2015-2020 (expected)

Virginia Tech

Advisor: Dr. Dongyoon Lee

Dissertation: *On the Impact and Defeat of Regular Expression Denial of Service*

B.S. Computer Science, B.S. Mathematics 2008-2012

Clarkson University

Research mentor: Dr. Takashi Nishikawa

Honors Thesis: *Relating Synchronizability to the Topological Properties of Networks Using a Linear Classifier*

EMPLOYMENT

Assistant Professor, Electrical and Computer Engineering Fall 2020-present

Purdue University

Graduate Research Assistant 2016-2020

Virginia Tech

- **Practice-motivated systems design:** Re-designing regex engines based on practitioners' perspectives.
- **Security in emerging paradigms:** Denial of service in event-driven frameworks and GraphQL.

Intern, Microsoft Research (RiSE group: Cloud Security) Summer 2019

Microsoft Research, Redmond, WA

Project sponsor: Dr. Patrice Godefroid

- Techniques and tools for web API security testing.

Intern, IBM Research (Storage) Summer 2018

IBM Research, Almaden, CA

Project sponsor: Dr. Deepavali Bhagwat

- Provenance collection system for machine learning applications (VLDB'20).

Software Engineer, IBM (GPFS) 2012-2015, Summer 2016, Summer 2017

IBM, Poughkeepsie, NY

- Developed distributed applications and tooling for cluster management and file system testing.
- Worked with and trained test teams in the US, the UK, Mexico, Germany, India, and China.
- Created five patents on techniques for file system testing.
